International Graduate Program – Trainee (f/m) IT Solutions for Research & Development

Job description

Our International Graduate Program is designed to strengthen your core competencies in preparation for a management career within Infineon's Information Technology. Joining the IGP will get you the full insight into Infineon: over the course of 18 months you will have at least three different assignments – one of them abroad. You will meet the global IGP community in global, regional and virtual conferences. You will get feedback after each assignment, a mentor who gives career advice and a permanent contract from the start. If you want to find out more about the program, please click on the banner to the right.

As a management trainee within our Information Technology (IT) department you will explore a fantastic journey within our organization. You will collaborate with your colleagues from IT, the business and external partners. You will learn how globally organized teams interact and actively contribute to design, build and run state-of-the-art IT solutions in an agile environment.

In particular you will get familiar with the most recent methodologies of software design and development and the resulting changes of the way of collaborating between IT and R&D community. You will discover how an agile approach shapes the setup of sustaining organizations and their operational procedures.

Your program consists of the following elements:

- First, you will understand the basic principles of **Agile Software Development, Continuous Delivery and DevOps.** You will interact with our R&D experts to **learn and design the best IT applications for the Infineon customers.**
- Then, you will learn how to **generate roadmaps** and **business benefits** by being part of the **business teams** in one of our R&D functional areas.
- Finally, you will follow the end-to-end process in terms of **design, implementation and operations for IT Services** in the above areas. For this part of your traineeship, you will be located at one of our subsidiaries in the **Asia Pacific** region.

In general, you have the opportunity to:

- Reflect on your experiences with your **dedicated mentor** on a regular basis.
- **Develop your intercultural competencies** and deepen your knowledge of our international business. A **stay abroad at one of our subsidiaries in the Asia Pacific region** is part of the program.

Profile

You make the impossible possible. You don't wait for the silver platter. You love change (which is guaranteed in the semiconductor industry). You are pragmatic and analytic (we need both at Infineon). Standing still is not your thing and you find inspiration in working on the big picture with your colleagues.

Plus, you fulfill the following hard fact based criteria:

At a glance

Location:	**Munich**
Job ID:	**27321**
Start:	**Oct 01, 2018**

Christian Miller
Talent Attraction Manager

- You have a **degree in Information Technology, Computer Science** or comparable – a specialization in **Software Theory or Systems** would be a plus.

- You have demonstrated your **leadership skills**, for example at university, during internships or during other extracurricular activities.

- You are familiar with **programming** and can use **standard back-office software like Excel, Word and PowerPoint**.

- You have gained **international experience abroad**.

- And of course you are **fluent in English - German** would be a plus.

And you fully agree to these statements:

- You are an **independent and self-motivated** individual.

- You can **consolidate and paint the big picture**.

- When you think about moving **to another country for at least three months,** you want to go immediately.

- **You like to work in teams that are very diverse and where everyone speaks English**.

- **You can't wait to present your concept in front of your team and management** (and doing so in English is fine too).

- Your friends would describe you as "technology-savvy".
