

International Graduate Program – Trainee (f/m) Digital Transformation for IT Enterprise Services

Job description

Our International Graduate Program is designed to strengthen your core competencies in preparation for a management career within Infineon's Information Technology. Joining the IGP will get you the full insight into Infineon: over the course of 18 months you will have at least three different assignments – one of them abroad. You will meet the global IGP community in global, regional and virtual conferences. You will get feedback after each assignment, a mentor who gives career advice and a permanent contract from the start. If you want to find out more about the program, please click on the banner to the right.

As a management trainee within our Information Technology (IT) department you will explore a fantastic journey within our organization. You will collaborate with your colleagues from IT, the business and external partners. You will learn how globally organized teams interact and actively contribute to design, build and run state of the art IT solutions in an agile environment.

You will get familiar with the most recent software development & testing methodologies and get to know the underlying project principles at Infineon in order to analyze and find optimization potentials. This will go hand-in-hand with the current ongoing Digital Transformation leading to more automation, agile methods and a smoother and more continuous delivery - including the handover to operation.

Your program consists of the following elements:

- You will start with **understanding the basic principles of Automated Testing and Release Management** - and **support your team** accordingly.
- Then, you will **get to know our Demand and Project Handling** – including **Agile Project Methodologies**.
- Finally, you will help **creating strategies** for bringing **Agile Methodologies, Continuous Delivery** and **Automated Testing** in a specific IT-area together.

In general, you have the opportunity to:

- Reflect on your experiences with your **dedicated mentor** on a regular basis.
- **Develop your intercultural competencies** and deepen your knowledge of our international business. A **stay abroad in Singapore** is part of the program.

Profile

In particular, you make the impossible possible. You don't wait for the silver platter. You love change (which is guaranteed in the semiconductor industry). You are pragmatic and analytic (we need both at Infineon). Standing still is not your thing and you find inspiration in working on the big picture with your colleagues.

Plus, you fulfill the following hard fact based criteria:

- You have a **degree** in **Business Informatics, Computer Science** or comparable.
- You have demonstrated your **leadership skills**, for example at university, during internships or during other extracurricular activities.

Christian Miller
Talent Attraction Manager

- You are familiar with **programming** and can use **standard back-office software like Excel, Word and PowerPoint**.
- You have gained **international experience abroad**.
- And of course you are **fluent in English - German** would be a plus.

And you fully agree to these statements:

- You want to **be the driver** in order to **improve a certain area**.
- You like to **motivate a team for a defined target**.
- When you think about moving **to another country for at least three months**, you want to go immediately.
- **You like to work in teams that are very diverse and where everyone speaks English**.
- **You can't wait to present your concept in front of your team and management** (and doing so in English is fine too).
- Your friends would describe you as "technology-savvy".
